

Niraj Kumar Agarwal

niraj.ku.agarwal@gmail.com | LinkedIn | GitHub | Portfolio

Technical Skills

Languages: Java, TypeScript, JavaScript, SQL

Full Stack: React, Node.js, Express.js, Spring Boot, Tailwind CSS, Vite

Databases: PostgreSQL, MySQL, MongoDB, Supabase

AI & Automation: OpenAI API, Claude API, Playwright, Prompt Engineering, LLM Integration

Developer Tools: Git, GitHub, Postman, IntelliJ IDEA, VS Code, Vercel, Agile/Scrum

Experience

Capgemini

Software Engineer

Sep 2025 – Present

Kolkata, India

- Develop AI-powered workflow accelerators using React, TypeScript, Node.js, Express.js and LLM APIs to automate enterprise UX and design workflows.
- Collaborate within a 10-member engineering team delivering internal AI products adopted by approximately 10 UX designers.
- Integrate Claude and OpenAI models with browser automation, reusable backend APIs and prompt orchestration pipelines.
- Build responsive React interfaces and scalable Express services while contributing across Java and Spring Boot ecosystems.
- Follow Agile engineering practices including Git workflows, code reviews and modular software architecture.

RDV AI

React, TypeScript, Node.js, Claude, OpenAI

- Built an AI-powered UX workflow platform automating research, personas, user journeys, wireframes and interactive prototypes from a single prompt.
- Orchestrated Claude and OpenAI APIs to generate up to 10 UX artefacts through a multi-stage AI pipeline.
- Developed browser-based interactive prototype previews with HTML export and Figma JSON export.
- Collaborated within a 3-member engineering team to deliver an internal AI accelerator for enterprise designers.

Xsight

React, Node.js, Playwright, Claude

- Independently engineered an AI-powered accessibility and usability evaluation platform for websites and Figma designs.
- Integrated Playwright browser automation with Claude AI to evaluate interfaces using WCAG and Nielsen heuristics in approximately 20 seconds.
- Built scalable backend APIs to process analysis results and surface structured AI-generated recommendations.
- Designed reusable frontend components for interactive reports and usability insights.

Projects

FreshEra Console

React, TypeScript, Supabase, PostgreSQL

- Sole architect and full-stack developer of a modular agency operating system integrating CRM, client portals, project management, invoicing, scheduling, analytics and document automation.
- Designed relational database models, reusable APIs and role-based authentication secured using Supabase Row-Level Security.
- Engineered reusable invoice, proposal and document generation workflows with PDF export and centralized asset management.
- Integrated Cal.com scheduling, workflow automation and responsive dashboards to streamline end-to-end agency operations.

Education

University of Engineering & Management

Bachelor of Technology in Computer Science & Engineering — CGPA: 8.0

May 2025

Kolkata, India
